# Video recording

During part of this session, a film crew from OpenAIRE will record some general images:

- Shots from speakers, audience participation and projected presentations;
- NO SOUND RECORD.

The film crew will make sure not to interrupt the session or in any manner distract the participants attention.

**If you do not want to be filmed please let us know.**

# Workshop Agenda

- Context:
  - The research information management ecosystem and IR
  - MoU OpenAIRE / Duraspace
- Guidelines & recommendations (OpenAIRE and ORCID)
  - OpenAIRE Guidelines for Literature Repository Managers 4.0
  - ORCID recommendations
  - Guidelines Implementation - DSpace and Aggregator
  - Use cases
- Community collaboration

# Workshop Agenda

- **Context:**
  - The research information management ecosystem and IR
  - **MoU OpenAIRE / Duraspace**
- **Guidelines & recommendations (OpenAIRE and ORCID)**
  - OpenAIRE Guidelines for Literature Repository Managers 4.0
  - ORCID recommendations
  - Guidelines Implementation - DSpace and Aggregator
  - Use cases
- **Community collaboration**

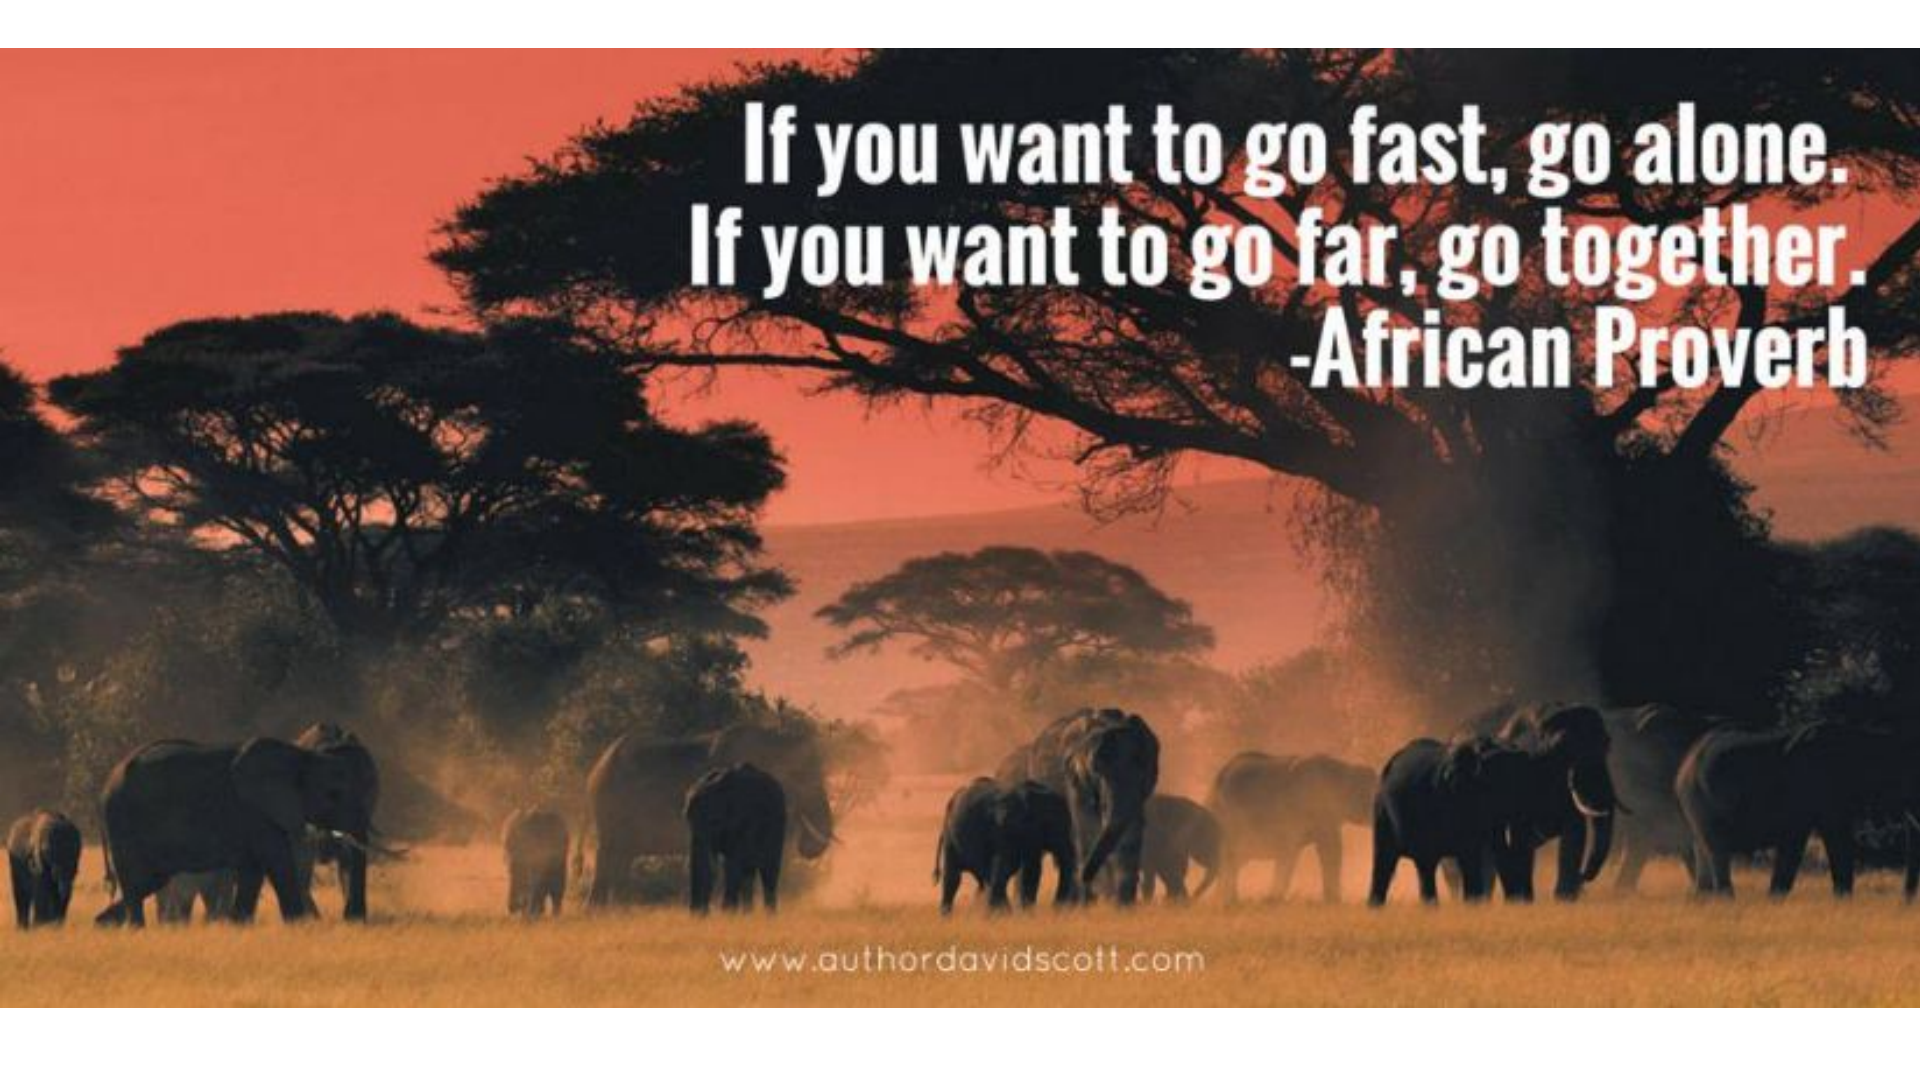

# The research information management ecosystem and IR

# Implementation strategy: homegrown / base code

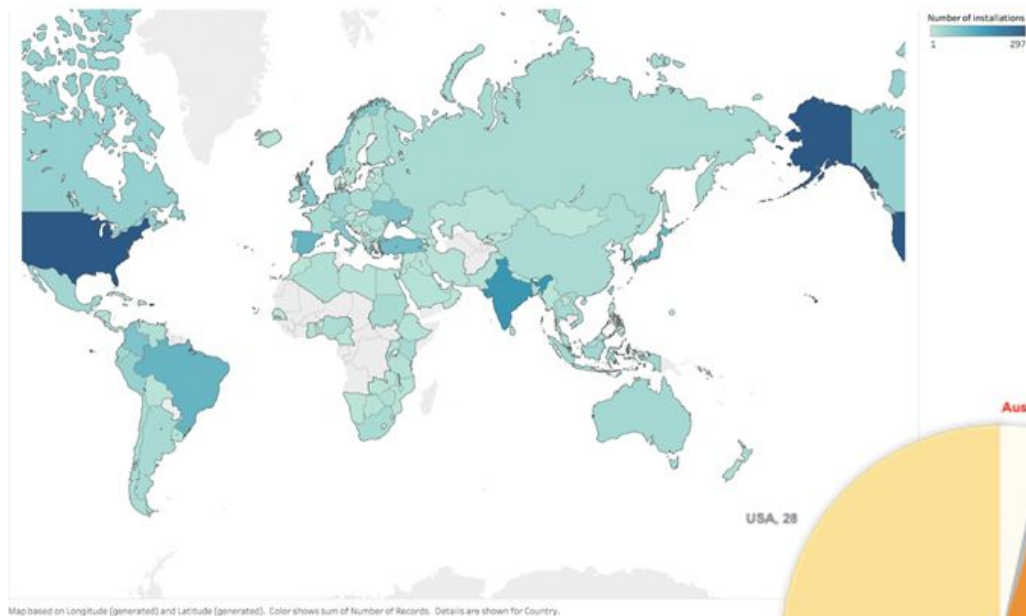

A herd of elephants is silhouetted against a warm, orange-hued sunset sky. The elephants are standing in a grassy field, with some facing left and others right. In the background, there are large, dark acacia trees and rolling hills. The overall scene is peaceful and evokes a sense of community and journey.

**If you want to go fast, go alone.  
If you want to go far, go together.  
-African Proverb**

# DSpace Community

What we know: 2445 installations in 122 different countries

\*Based on the [DuraSpace Registry](#)

# OpenAIRE partnership

## Objective

---

The strategic partners will work together:

- ☐ To promote a gradual compliance of the DSpace with the OpenAIRE Literature Repository Guidelines v4.0
- ☐ To support assessment of research results by help of globally distributed and aggregated usage statistics
- ☐ To promote the realization of optimal repositories as described in the Next Generation Repository Technologies report by the COAR Working Group nationally \ and internationally
- ☐ To engage the respective communities and stakeholders in the partnership activities and to communicate the result of the partnership internationally

## Memorandum of Understanding between DuraSpace and OpenAIRE

---

The purpose of this Memorandum of Understanding (MoU) is to establish and promote a strategic and cooperative partnership between DuraSpace and OpenAIRE.

## MoU signed on September 25, 2018

## Responsibilities

---

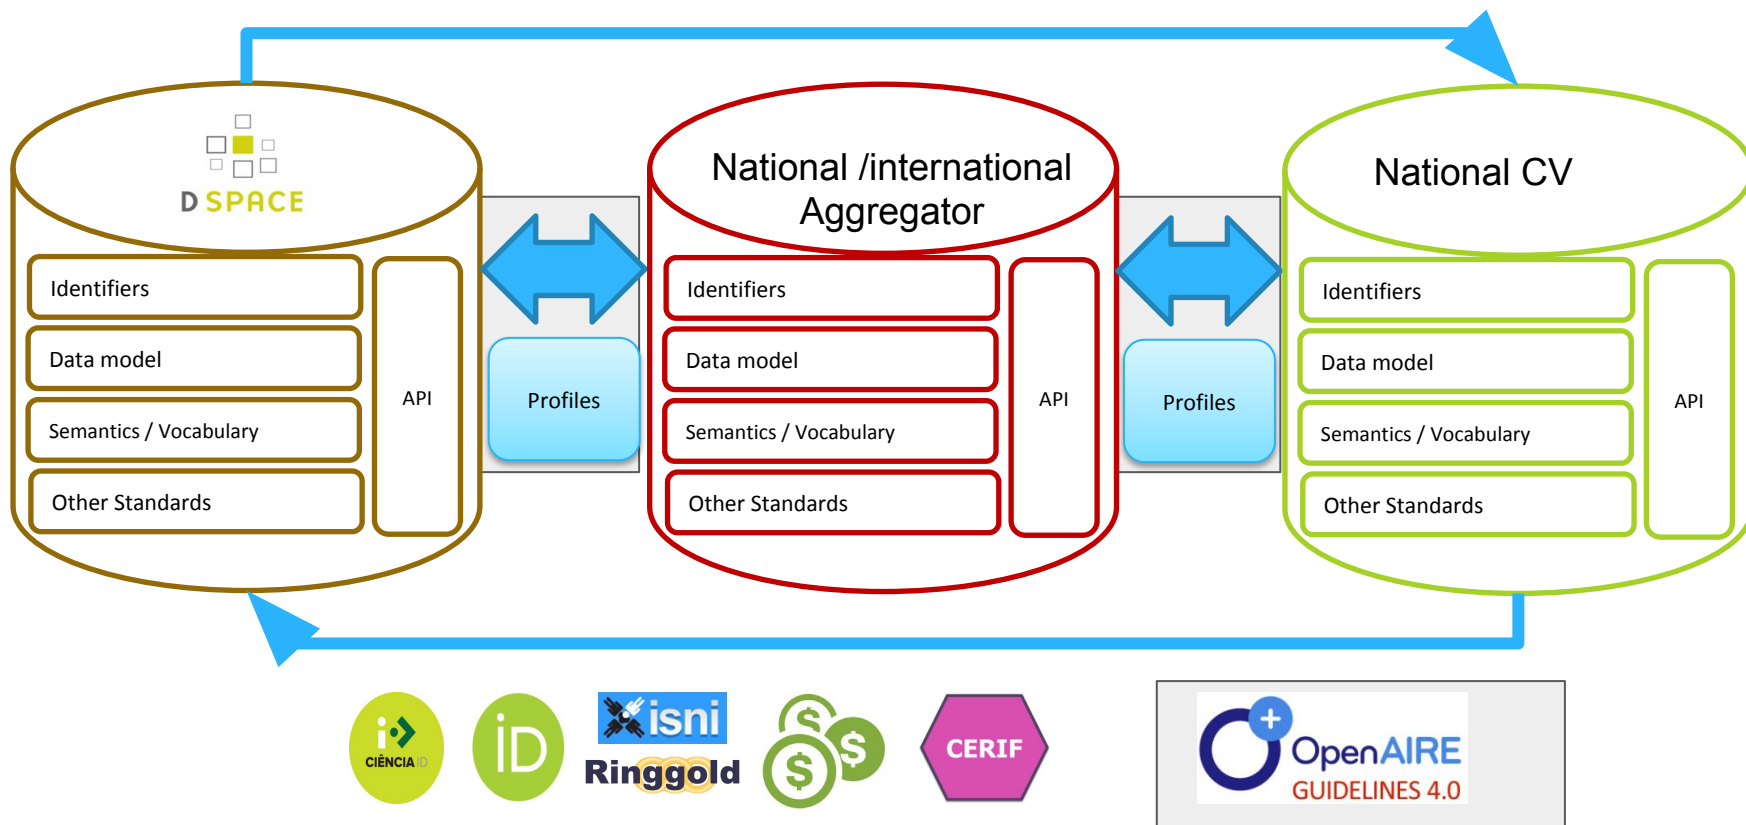

In order to achieve the above mentioned objectives, both partners agree on the following concrete actions for collaboration:

- ☐ There will be a joint working group in order to facilitate the collaboration and to identify together functionalities and implementations. Examples are:
  - o Management of entities such as Author, Funding (and possibly Organization);
  - o Expose and exchange data via the OpenAIRE metadata format, in community used protocols (e.g., OAI-PMH, ResourceSync);
- ☐ The Working Group will define a development roadmap that will be proposed to the DSpace Governance (Steering and Leadership Group) and the OpenAIRE Steering Committee and will include responsibilities and tasks accordingly; If approved by both Governance bodies, the partners agree to work on those new implementations and functionalities within the DSpace 7 release activities.
- ☐ Partners will coordinate communications activities related to the execution of the MoU and the activities and results of the Working Group
- ☐ The partners will promote the outcomes of the joint working group to strengthen the participation and engagement of the community members.

# Workshop Agenda

- Context:
  - The research information management ecosystem and IR
  - MoU OpenAIRE / Duraspace
- Guidelines & recommendations (OpenAIRE and ORCID)
  - OpenAIRE Guidelines for Literature Repository Managers 4.0
  - ORCID recommendations
  - Guidelines Implementation - DSpace and Aggregator
  - Use cases
- Community collaboration

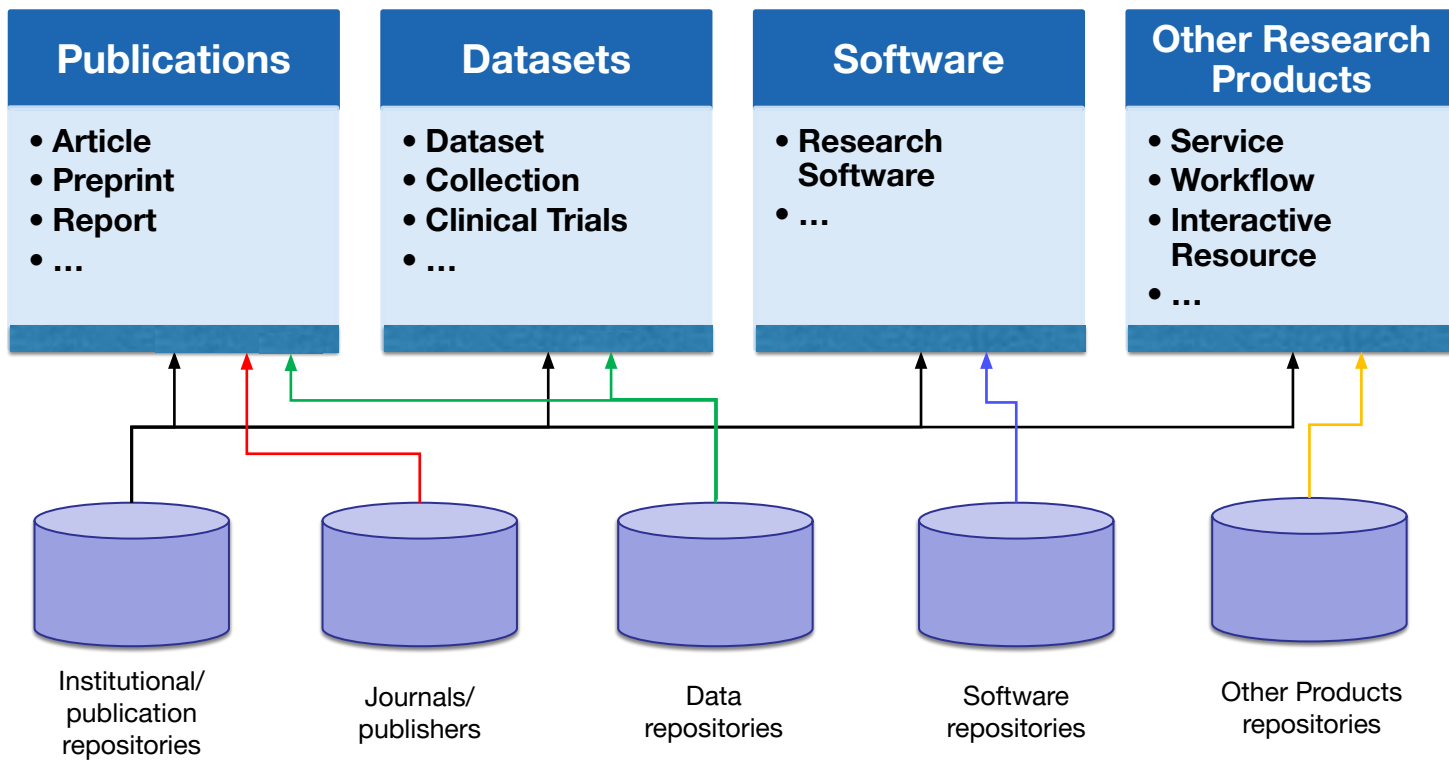

# The research information management ecosystem and IR

# OpenAIRE Guidelines For Literature Repository Managers

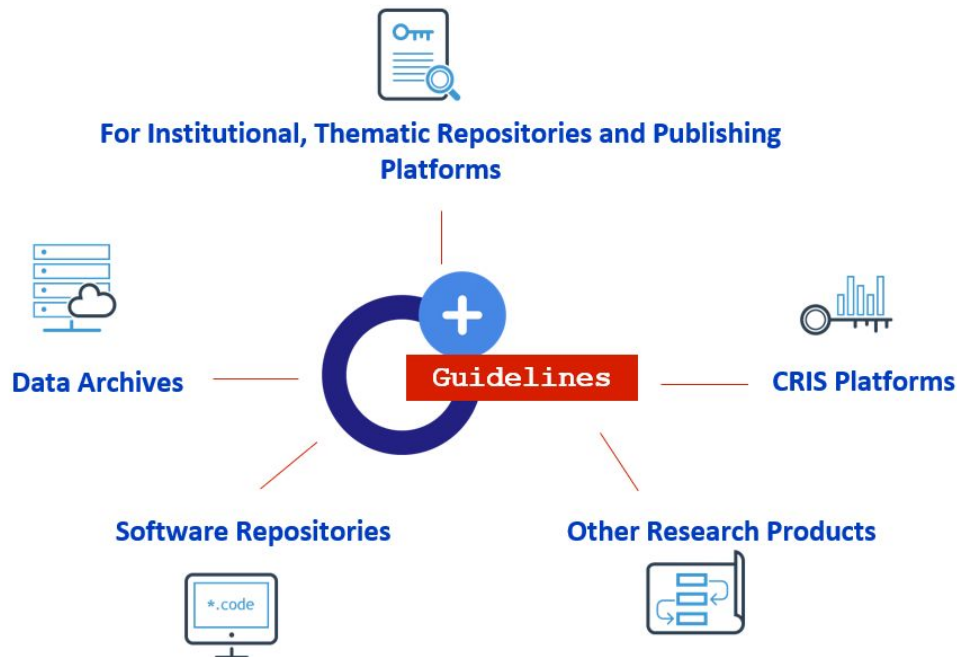

- **A tool to define and implement local data management policies.**
- **They meet the requirements of OpenAIRE - Open Access Infrastructure for Research in Europe and the Open Access strategy of the European Commission.**
- **A guide to expose open access and non-open access publications together with funding information.**
- **Authors interact with OpenAIRE infrastructure.**

# Goal 1: Diverse Types of Research Results

# OpenAIRE's Guidelines for Open Science Content Providers

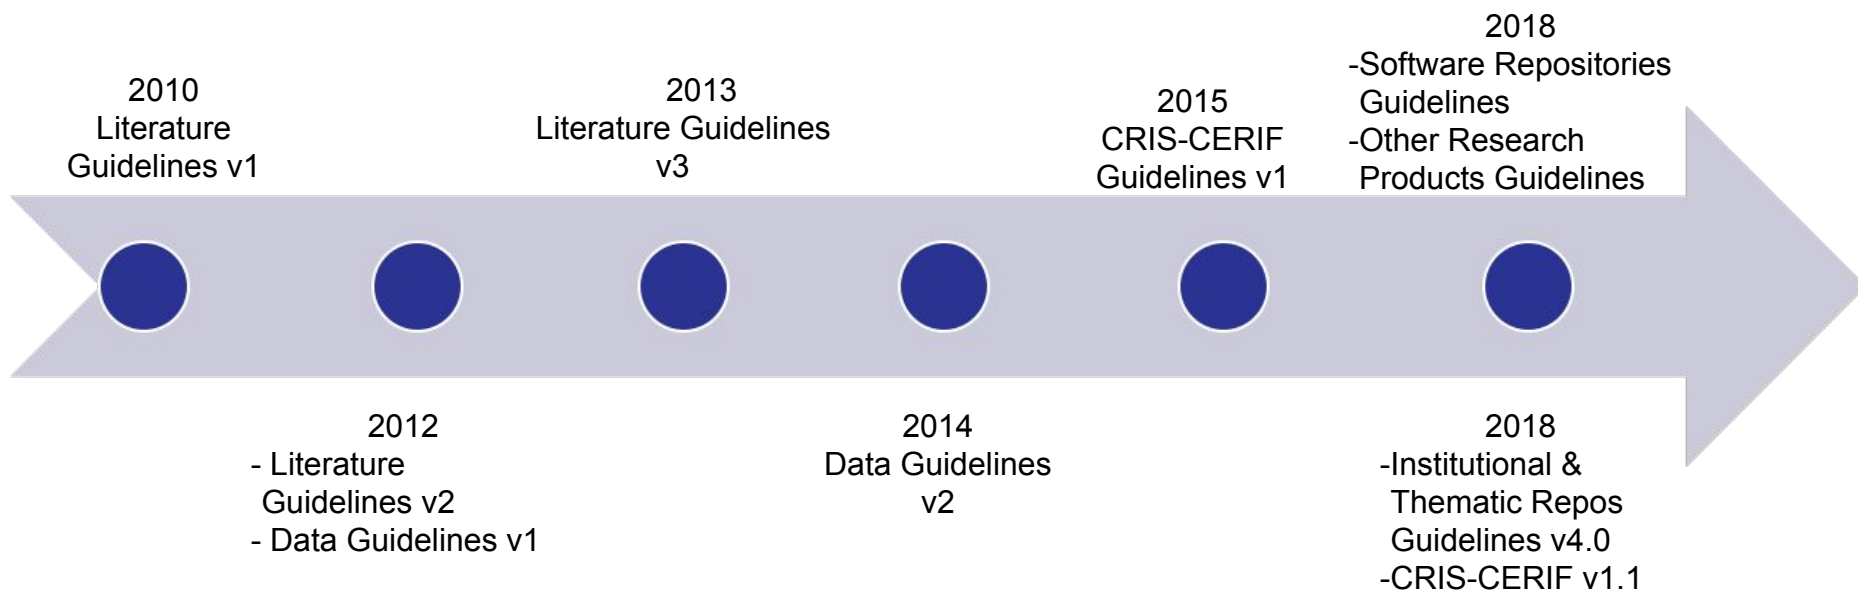

## Goal 2: Metadata Enrichment

Goal	Metadata Groups
Discovery and Citability	Descriptive metadata
Accessibility and Reuse	Access Rights, License Conditions
Contextualization	Research Project, Linked Research Artifacts
Interoperability	<b>Identifier for Entities, Controlled Vocabularies</b>
Reporting	Funding Reference
TDM	File Location, License Conditions

# Evolution of OpenAIRE Guidelines

# What's new

- Application profile and metadata schema based on Dublin Core & DataCite metadata.
- Require a new OAI metadata prefix “oai\_openaire”.
- Supports various identifier schemes for entities like authors, organisations, funders, scholarly resources.
- Introduction of COAR Controlled vocabularies (access rights, resource types, version types).
- Compliance with OpenAIRE Content Acquisition Policy (published on Oct 2018).

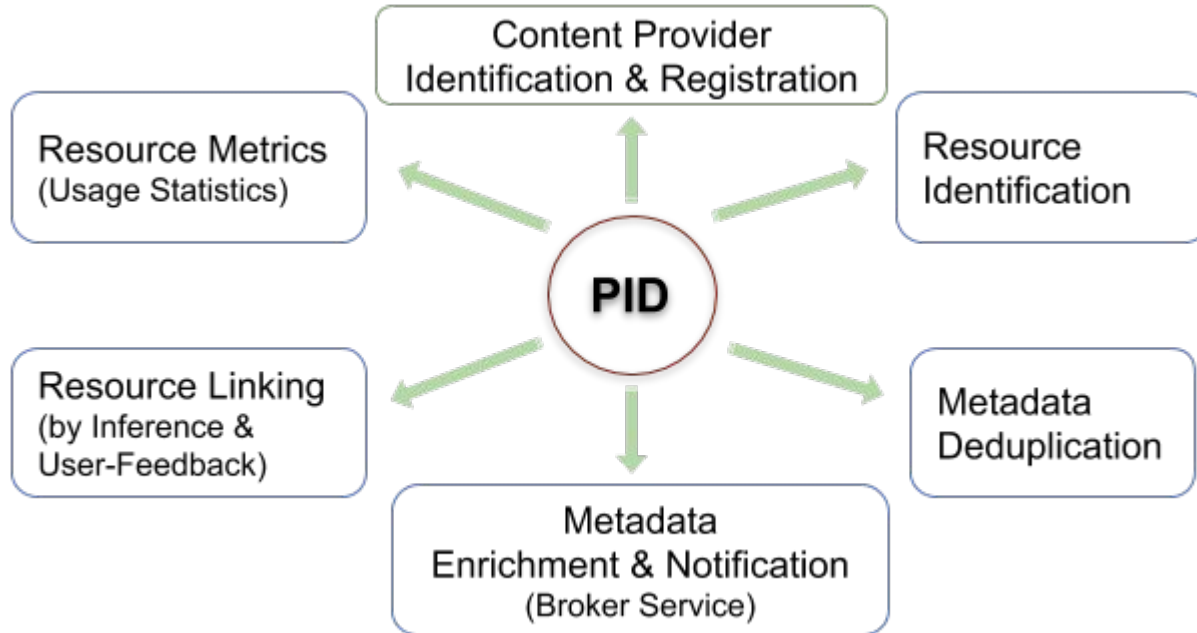

“

**Metadata describing Open Access and non-Open Access material will be included and links to other products will be resolved where this is possible (i.e. the provided PIDs have a resolver).**

*as stated in the  
Content  
Acquisition Policy*

”

# Role of PIDs in OpenAIRE

# OpenAIRE Guidelines for Literature Repository Managers v4.0

- Based on established standards: Dublin Core and DataCite metadata scheme
- For description of textual and data publications
- Application Profile
- Controlled Vocabularies aligned with the other OpenAIRE Guidelines

<http://dx.doi.org/10.5281/zenodo.1299203>

# Application Profile Properties

Requirement levels for the metadata properties:

- **Mandatory (M):** The property must always be present in the metadata. An empty value for the property is not allowed.
- **Mandatory if Applicable (MA):** When the property value can be obtained it must be present in the metadata
- **Recommended (R):** The use of the property is recommended
- **Optional (O):** It is not important whether the property is used or not, but if used it may provide complementary information about the resource

  - The research information management ecosystem and IR
  - MoU OpenAIRE / Duraspace
- Guidelines & recommendations (OpenAIRE and ORCID)
  - OpenAIRE Guidelines for Literature Repository Managers 4.0
  - **ORCID recommendations**
  - Guidelines Implementation - DSpace and Aggregator
  - Use cases
- Community collaboration

# ORCID partnership

**June 2018** – **ORCID** and **DuraSpace** talked about a **collaboration** aiming at engaging the two **communities** to implement recommendations

**June 2018** – **ORCID in Repositories Task Force** was launched. **15 members** from **12 countries** (on **6 continents!**) worked on reviewing and providing feedback on proposed recommendations for supporting ORCID in repository

**October 2019** – The Task Force **unveiled a draft recommendations for public comment**

**February 2019** - the Task Force has released its **Recommendations**

# DSpace & ORCID in Repositories Recommendation

	DS6	DS7
<b>Collecting ORCID iDs:</b>		
Via direct interaction with the author/contributor (related to authentication)		
Via mediated deposit by administrator (pull in of ORCID IDs when submitting; searching through the ORCID ID)		
Via bulk import by administrator		
<b>Displaying ORCID iDs</b> (already in the XMLUI)		

# DSpace & ORCID in Repositories Recommendation

	DS6	DS7
<b>Pushing information to ORCID (requires ORCID licence)</b>		
<b>Administrative features:</b>		
Configure which API to use		
Provide an option for testing on the ORCID sandbox		
Export a report of stored authenticated ORCID iDs, access tokens and/or ID tokens, and related data		
Include authenticated ORCID IDs in exported records (JSON, CSV, RDF, etc.)		
Include authenticated ORCID iDs in OAI-PMH output		

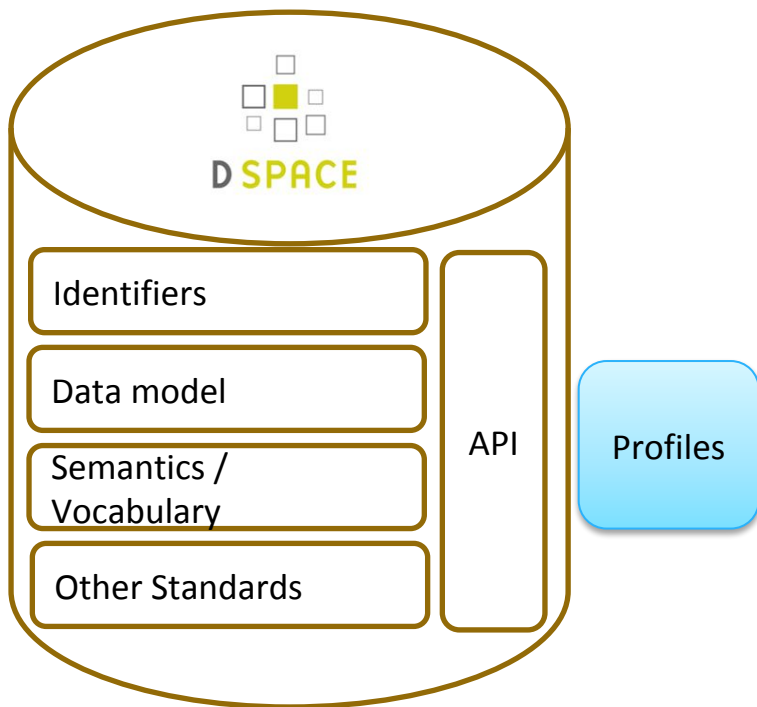

# Workshop Agenda

## 4. AUTHORITY CONTROL

Authority control for CRIS entities (authors, organizations; funding)

### i CRIS Systems:

- Authors
- Org Ids
- Funding

### ii IRs:

- Authors
- Org Ids
- Funding

### iii RCAAP Portal:

- Authors
- Org Ids
- Funding

## 4. Authority Control for Authors

Possibility to associate an author name with a unique identifier (ORCID or / and Ciência ID)

### Submit: Describe this Item

Please fill in the requested information about this submission below. In most browsers, you can use the tab key to move the cursor to the next input box or button, to save you having to use the mouse each time.

Introduza o título principal do registo.

**Título \***

Se necessário, indique o título alternativo ou tradução.

**Outros Títulos**

 Add More

Introduza o nome do(s) autor(es) do trabalho e clique para procurar o respetivo identificador no ORCID ou Ciência Vitae.

**Autores \***

 Add More

This feature  
invokes Ciencia  
ID or ORCID in
